ZKPOS RESTAURANT ORDERING APP

Version: 2.5.0 Date: 01-08-2021 Software Version: 2.5.0

GETS STARTED

Restaurant & Hotel POS

Usually in every restaurant you have to wait for a waiter to place your orders. They will pass your orders to kitchen and again you have to wait for your favorite dish. Our Restaurant and hotel POS (android) application is a solution for this. You can replace waiter and a menu book with this application. Just install this app in your tablet or mobile and place it in your restaurant. Customers themselves can select the items and send orders to the kitchen using this. This order app is synchronized with the restaurant POS so that every orders placed in this app is accessible in restaurant POS. From there you can process their orders as you wish. The application is highly user friendly and time efficient. Now let's learn to use our Restaurant & Hotel POS Order App.

STEP 1 - ADMIN LOGIN

- Open the order app in your tablet or mobile.
- Enter the User ID and click on enter button.
- Again, enter the Password and click on enter button.
- Note that default User ID and Password is 1.

• To know about the version details, click on about button near to settings

STEP 2 - MAIN MENU

After login you will be redirected to the MAIN MENU. The following figure shows the main menu for your ZKPos Restaurant order app. As you can see, there are 9 main menu options; DINE IN, QUICK SERVE, DRIVE THRU, TAKE AWAY, CUSTOMERS, DELIVERY, ONLINE ORDER, BAR AND BEVERAGE, UNSETTLED. We will see each of them one by one.

• Now you are taken to the MAIN MENU.

STEP 2.1 - DINE IN

Here you can select the table and add items for taking order.

ZKPOS RESTURANT ORDER APP USER MANUAL

- Click on DINE IN option.
- Some Default Area and tables are there.
- You can create area and table from ZKPOS Restaurant software.
- Table occupied or table with open ticket are shown in green color.
- And others are shown in grey color.
- There is a home button to go to main menu.
- You can choose any area and table.
- Click on a table as your wish. •
- Now a pop up will be shown to select the table seat.
- You can select particular table seat here. •
- For instance, if you have selected table T5, then all seats allotted to T5 will be displayed.
- You may ask to select your seat. Green colored seats may be already occupied or they may have unsettled invoice.
- Seats are named as 1, 2, 3, and 4 and so on. Click on the seat number that you want to choose. Now you will be redirected to the main part of POS module.
- If you disable table seats from ZKPOS Restaurant software, then you will be directly go to POS sale module.
- You can see the table number T5 there.

Here is where you could see all the departments and products that you have created. You can see the search field to find a product easily. If a customer approaches you to order some items, let's see how you are going to click Send Order Button. In the picture above you can see all departments listed in a horizontal format. You can expand the departments just by clicking on them.

- Click on the department and select the products from the product window.
- You can see a drop-down option name as None there.
- From the drop down you can select any special or extra charges.
- For that you have to enable the special charges in Utility as well as create extra charge as percentage in ZKPOS Restaurant software.
